

## How Understanding Spirituality Will Make You Unstoppable

"What has been will be again, what has been done will be done again; there is nothing new under the sun." Ecclesiastes 1:9

Being Spiritual means being aware, the more aware we are the more spiritual we become. Awareness signifies remembrance. If we only need to remember that means we know it all already somewhere within ourselves.

The truth sets us free, If you argue with truth you will always loose. When we hear ultimate truth we know its right without anyone having to convince us, even if we don't recall hearing it before, the part of us that does remember everything makes it clear to us by how we feel inside namely at peace and as if a load has been lifted from us.

There is no right or wrong

There is no best or worst place

There is only your place

If you are experiencing and creating what you want in life all well and good.

If you feel lacking and unfilled read on you may begin to understand why

Q-If your life is good and someone or something could make it even better would you take them up on it?

Q -If you were wealthy and someone offered you the chance to make a fortune what would you say?

A- Most of us would listen and take up the opportunity.

But when it comes to our spiritual life and well-being we prefer to stick and keep the status quo.

Q- What would be more beneficial to you, earning some extra money or growing spiritually which will in turn enable you to have what you want in your life and be happy in the process in all areas just not your bank account.

This is why the bible says in Matthew 5:3 "Blessed are the poor in spirit, for theirs is the kingdom of heaven." Poor in spirit denotes those people who realise, there is more to life than they are experiencing and look to find their real selves which has unlimited potential and all the solutions to their problems.

The kingdom of heaven represents the ideal life you would like to live. Your whole life becomes your heaven on earth.

"Blessed are the poor in spirit, for theirs is the kingdom of heaven." The kingdom of heaven is within us. If that is the case it means if we can tap into that source nothing will be impossible for us. This is why the bible describes the kingdom as buried treasure we are the field and the pearl is deep inside of us. If you have great treasure in your possession wouldn't it make sense to use it? Matt 13:44-46

Q - How do we find this treasure within us?

A - By being more aware which means BE-IN-GOD.

Join my mailing list to get details of my upcoming e-book "Go within or go without" Which expounds on the above question.

I have 2 beautiful analogies coming up which sums up the state a lot of us are in spirituality.

- 1) The power of awareness
- 2) The power of Change

First of the power of Awareness

Scenario- It's the year 2000 and 2 friends want to speak to each other one is in London and the other is in New York, What would be the quickest and cheapest way for them to speak?

A- VOIP using the internet

Q - Go back 50years to 1950 with the same scenario how would they communicate?

A - They would probably use a telephone

This would take Instant milli seconds .This would take little effort but have higher costs.

Q - Go back 150years to 1800 with the same scenario how would they communicate?

A - They would probably write a letter

This would take 2 or 3 weeks probably for the letter to reach its destination, if it gets there at all. This would more time and effort and cost more

Q - Go back 300years to 1500 with the same scenario how would they communicate?

A - They would probably get on a boat

This would take 2 possibly 3 months maybe longer depends on the current and type of vessel This would take even more time and cost more money again 100's of not 1000's of pounds

Q - Go back 3000 years to 1500BC with the same scenario how would they communicate?

A - They would probably be swimming

This would take I cant imagine how long so many variables involved and they may not even make it. What if they were swimming in the wrong direction and ended up in Africa, how much time would it take to get back on track?

You can see from this example how awareness brings solutions and quickly

The end result is effortless and easy. A spiritual solution is SUPERNATURAL it is FAST TRACK and it is FULL PROOF. IT IS QUANTUM

Who wouldn't want that?

Awareness shows the way. The things we once valued depreciate as new jewels come to the surface.

Q- What era are you in Spirituality?

Q- The way you handle your obstacles answers the question?

The Power of Change

Today's music is produced using the latest digital MP3 and MP4 technology.

Well I have news for you MP3 is not the latest recording technology it is in fact one of the earliest technologies..

The reason why it has not been discovered until recently is this, no vehicle was available for it to be bought into the human experience in its digital form. Music and speech has always consisted of sound waves.

Music recording technology is re-volving back to spirit.

Q- How can I say this?

A - There are certain characteristics in spirit which are parallel to music technology

You cannot physically hold an mp3 file, you can only hold the carrier of the mp3.

Spirit comes from Source which is infinite and invisible to us

The music vehicle is going back to the wave form through digital (smaller & smaller)

Spirit is energy, vibration and waves which become material things

There is flexibility in digital files, today you can cut chop spilt merge and burn an mp3 and still have the original in tact.

Spirit is flexible and changeable - Starting in spirit speeds up the change you want to see in your life. Not starting with spirit would be like trying to record song 8 from a tape cassette, long-winded and arduous with inferior quality.

But in life this is what a lot of us do, we think the cassette is all there is and have no experience of digital music and think castes are all there is.

The great entrepreneurs, innovators and inventors of our time, where those who stretched the boundaries and ask the questions

What if and is there more? The answer is always yes. Where would we be today without those types of people? If more of us approached our spiritual lives in this way the world would be a better and much happier place.

In the 1870's Vinyl was the bees knees of recording cutting edge stuff

In the 1930's It was the cassette on digital strips

In the 1980's It was CD's

And now it is the Mp3

Once you have experienced the superior quality of mp3 would you want to go back to cassette, CD or vinyl?

Music technology has evolved with time, our mainstream concept of spirituality sadly has not. There is much out there to be re-membered and just like the mp3 once you experience it you would have no intention of going back to vinyl (spirituality speaking, unless you are a glutton for punishment) not because one is better than the other but because of the flexibility and options you have at your disposal.

Are you beginning to see the benefits and importance of developing your spiritual life?

When there are great advances in technology people grab hold of the latest equipment and keep up with the times.

We are at a time of great spiritual opportunity but not everyone realises or sees it. There has been major positive changes over the last few decades which have gone unutilised by many of us.

What would benefit you more updating your mobile phone or upgrading your spiritual life?

Your spirit is always with you, your mobile phone is not

Where would the wise man invest for a secure future?
